## bionic performance

**Von der Natur gelernt und für das Leben gemacht – die Funktionalität von Flotex folgt dem Prinzip der Bionik. Bionik steht für die Übertragung von Problemlösungen aus der Natur auf technische Entwicklungen und Innovationen.**

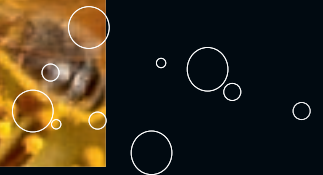

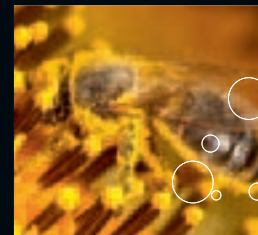

### Strapazierfähigkeit durch Flexibilität

Bambus ist kräftig, widerstandsfähig und gleichzeitig flexibel. Die Zweige lassen sich biegen, ohne zu brechen. Die Flotex Fasern sind robust, halten stärksten Belastungen stand und kehren stets in ihre Ausgangsposition zurück. Somit meistert Flotex, ähnlich wie Bambus, Belastungen sehr flexibel.

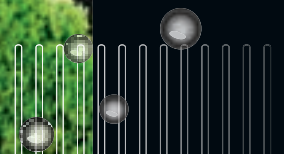

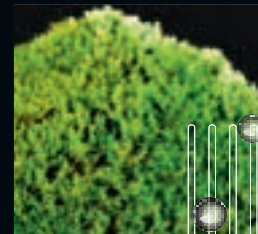

### Reinigung ohne Anstrengung

Bienen sammeln Nektar und nehmen dabei automatisch, ohne besondere Anstrengung, Pollen auf. Nach ähnlichem Prinzip binden die bis zu 80 Millionen 6.6 Nylonfasern der Flotex-Konstruktion feinen Staub und Allergene aus der (Raum-)Luft. Diese werden durch einfaches Bürststaubsaugen später wieder frei gegeben.

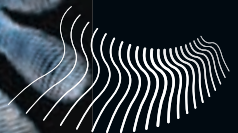

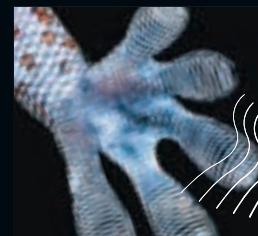

### Komfort für jede Bewegung

Moos hat eine weiche Oberfläche, bei jeder Berührung verformt es sich, kehrt danach aber wieder in seine Ursprungsform zurück. Ähnlich wie Moos bietet auch Flotex einen komfortablen Auftritt. Dabei passen sich die widerstandsfähigen Fasern allen Belastungen an und stellen sich danach sofort wieder auf.

### Rutschsicher in jedem Zustand

Die Füße eines Gekkos bestehen aus tausenden feiner Härchen. Diese lassen ihn Wände und Bäume sicher emporklettern ohne abzurutschen. Bei Flotex wird diese Eigenschaft durch bis zu 80 Millionen Fasern erzielt. Sie garantieren einen guten Auftritt und Rutschsicherheit im trockenen und auch feuchten Zustand.

# Die Vorteile eines **textilen Bodenbelags** plus perfekte Hygiene!
